

**Professor/Director of Paediatric Diabetes & Endocrinology  
Monash Children's Hospital**

**Monash Health**

Dear Colleague,

We are delighted to extend to you an invitation to apply for the dual role of Professor/Director of Paediatric Endocrinology and Diabetes at Monash Health, in partnership with Monash University. This appointment represents a unique opportunity to lead and innovate within one of Australia's most dynamic health care and academic environments.

Monash Health is Victoria's largest public health service, dedicated to delivering exceptional health care across the lifespan to our community. Our team of over 18,000 staff works tirelessly across more than 40 locations, including Monash Children's Hospital (MCH) - a cornerstone of paediatric health care offering extensive services across three campuses.

In this position, you will lead the Department of Paediatric Endocrinology & Diabetes, renowned for its holistic care and collaborative methods in addressing endocrine disorders and diabetes in young patients. The DPED is recognised for its outstanding performance, overseeing a patient base exceeding 800 individuals and pioneering novel clinics and initiatives aimed at notably decreasing visits to the emergency department.

This position also entails a significant academic component through Monash University, a global leader in education and research. The successful candidate will drive research and educational initiatives in paediatric endocrinology and diabetes, fostering a culture of research and innovation that aligns with our commitment to improving health outcomes.

Your responsibilities will include leading our dedicated team, advancing our clinical services, enhancing our national and international reputation, and attracting research funding for your area of research interest and department's activities. You will play a pivotal role in shaping the future of paediatric endocrinology and diabetes care and research, with an ongoing focus on quality, safety, and financial management.

We are seeking an individual with exceptional leadership skills, a passion for clinical excellence, and a proven track record in research. Essential qualifications include registration with the Australian Health Practitioner Regulation Agency (AHPRA), FRACP in paediatric endocrinology or equivalent, and a higher degree such as a PhD.

At Monash Health, we are committed to fostering a diverse and inclusive environment that reflects our values of integrity, compassion, accountability, respect, and excellence. We believe that our goals are best achieved by a team that brings together a wide range of perspectives, skills, and experiences.

The impact of your work will extend far beyond the confines of our hospitals and campuses. It will touch the lives of the countless children and families we serve, contribute to the global body of knowledge in paediatric endocrinology and diabetes, and shape the future of healthcare in Australia and beyond.

Your appointment to this role marks an exciting milestone in our journey toward excellence in endocrinology & diabetes care, research, and education. We are confident that your exceptional skills, passion, and dedication will make a significant impact on our department and, most importantly, on the lives of the patients we serve.

**For more information, please see the additional information enclosed within this briefing microsite.**

**To learn more about this exciting opportunity, please contact our advising consultants:**

**Laurence Sims, Principal Consultant - [laurence.sims@alumniglobal.com](mailto:laurence.sims@alumniglobal.com) 0456 789 856**

**Sarah Curran, Researcher - [sarah.curran@alumniglobal.com](mailto:sarah.curran@alumniglobal.com) 0474 229 087**

We eagerly anticipate your contributions to our mission of providing exceptional care, advancing medical knowledge, and making a positive impact on the lives of our patients.

On behalf of myself and the executive team, we thank you for your interest and look forward to receiving your applications and meeting you in due course.

**Yours Sincerely,**

**Professor Nicholas Freezer**

**Medical Director, Monash Children's**
